CTG Master Class

Rome

11th - 12th of May 2020

Neoventa Academy

Welcome to CTG Master Class!

The CTG Master Class will give you a deeper understanding of CTG and CTG interpretation and offers an incomparable opportunity for obstetricians and midwives to assess and interpret a wide range of real life obstetric emergencies. This highly esteemed course is run by the team at St George's University Hospital, London several times a year.

Overall aim is to differentiate between fetal compensation and decompensation so as to ensure timely and appropriate action. It is sincerely hoped that by the end of the CTG Master Class, delegates would be able to recognise features of fetal response to stress on the CTG Trace and also to predict the next change on the CTG Trace!

Faculty

Edwin Chandraharan, UK
Giuseppe Rizzo, IT
